Process Assessment & Improvement

- ① Standard CMMI Assessment Method for Process improvement (SCA)
It provides a five step process assessment model that incorporates five phases: initiating, diagnosing, establishing, acting &
- ② CMM-Based Appraisal for Internal Process Improvement (CBA)
It provides a diagnostic technique for assessing the relative maturity of the organization in SEI CMM
- ③ SPICE - The SPICE (ISO/IEC 15504)
It defines a set of requirements for the process assessment. The intent of the standard is to assist organization in developing a process improvement plan.
